SOURCE OF CREATIVITY

Available in a variety of styles ranging from classic to contemporary, Luminarc's designs and colours will spark your creativity on a daily basis.

Subtle colours and simple or sophisticated designs are made to withstand intense, everyday use.

Healthy meals for the whole family: Luminarc's colours do not contain lead and are increasingly manufactured with organic, cadmium-free inks.

Printed designs

Printed designs produced through silkscreen or pad printing techniques, never fade despite frequent dishwasher or microwave use.

SOURCE D'INSPIRATION

Du style classique au contemporain, les décors et les couleurs Luminarc stimulent chaque jour, et pour longtemps, la créativité de la consommatrice.

Des couleurs subtiles et des décors simples ou plus raffinés conçus pour résister à un usage intensif quotidien.

Des repas sains et hygiéniques pour toute la famille : les couleurs Luminarc ne comportent pas de plomb et sont de plus en plus réalisées à base d'encre organiques exemptes de cadmium.

Décors imprimés

Les décors imprimés réalisés en sérigraphie ou en tampographie restent éclatants, malgré les passages répétés au lave-vaisselle ou au micro-ondes.

Sprayed colours

The spray application of organic inks represents a genuine revolution in the tableware market.

This technique adds incredible colours and effects to a new generation of everyday tableware.

Lead and cadmium-free sprayed inks are especially resistant to the wear and tear caused by the dishwasher. As well as in the microwave oven—(even metallic-effect colours).

Couleurs pulvérisées

La pulvérisation d'encre organiques est une véritable révolution dans l'univers des arts de la table.

Elle offre des couleurs et des effets incroyables pour une nouvelle génération de vaisselle utilisable quotidiennement.

Les encres pulvérisées, sans plomb ni cadmium, sont résistantes au lave-vaisselle. Elles passent toutes au four micro-ondes, y compris les couleurs à effet métallique.

Solid colour glass

The colour is directly added to the raw material used to make the glass, and the two are melted together.

The colour is permanently fused with the material.

Verre teinté dans la masse

La couleur est directement ajoutée et fondue dans la matière première du verre.

La couleur fusionne définitivement avec la matière.

OPAL AND GLASS BENEFITS

L'OPALE, UN MATÉRIAU AUX MULTIPLES ATOUTS

Les collections Arcopal sont particulièrement adaptées à la vie de famille et ses besoins quotidiens.

RÉSISTE À LA CASSE ET À L'ÉBRÉCHURE

L'opale Arcopal est renforcé par un traitement thermique spécifique appelé trempe, il est ainsi jusqu'à 3 fois plus résistant aux chocs que les autres matières.

RÉSISTE AU LAVE-VAISSELLE

Les produits en opale Arcopal conservent leurs décors et leur brillance jour après jour, lavage après lavage.

RÉSISTE AUX FORTS ÉCARTS DE TEMPÉRATURE

L'opale Arcopal résiste à des variations subites de 135°C : les produits peuvent passer sans risque directement du réfrigérateur au four micro-ondes.

100% HYGIÉNIQUE

L'opale Arcopal est une matière non poreuse, ce qui empêche les bactéries de s'y loger et le rend facile à nettoyer et hygiénique.

LE VERRE : BEAU ET 100% SAIN

Arcopal aime le verre, ce matériau noble qui joue joliment avec la lumière et la transparence, et apporte des notes gaies à nos tables. Les assiettes et verres Arcopal sont créés à partir des meilleures qualités de matières premières, des plus beaux sables, et on l'on récupère le verre cassé issu de notre production. Pas de gâchis !

Pas plus écologique que le verre : matériau non-poreux, qu'il soit transparent, décoré ou coloré, il ne retient aucun micro-organisme susceptible de créer une contamination bactérienne. Zéro mauvaise odeur, zéro coloration par les aliments, zéro rétention de bactéries, 100% sain !

OPAL, A MULTIPLE BENEFITS MATERIAL

Arcopal collections are especially well suited to families and their everyday needs.

THEY RESIST BREAKING AND CHIPPING

Arcopal opal is reinforced thanks to a special heat treatment called tempering, which makes it up to 3 times more shock-resistant than other materials.

DISHWASHER SAFE

Arcopal's opal products retain their decoration and their shine day after day, wash after wash.

RESISTANT TO DRASTIC TEMPERATURE CHANGES

Arcopal opal can withstand sudden variations of 135°C: it is safe to transfer the dishes directly from the refrigerator to the microwave.

100% HYGIENIC

Arcopal opal is a non-porous material, which prevents bacteria from accumulating in it, making it easy to clean and hygienic.

GLASS : FINE AND 100% HEALTHY

Arcopal loves glass, a fine material that plays beautifully with light, shine, and transparency and brings a bright look to our tables. Arcopal plates and glasses are made from the best-quality raw materials, the most beautiful sands, and we recover the broken glass from production. No waste!

The glass itself is just as ecological: the material is non-porous, whether clear, decorated, or coloured, and it doesn't trap any microorganisms that could lead to bacterial contamination. Zero bad odours, zero discolouration from food, zero trapped bacteria, 100% healthy!
